

DIRECTIONS: Shake well before use; contents may settle. When used in conjunction with biological products, dilute with chlorine-free water.

Application: Add 2 - 4 fluid ounces to enough water to irrigate 1 acre. Application rate will be based on the Cation Exchange Capacity (CEC) of your soil. Product may be applied through any irrigation system.

Soils with a CEC of 20 or less:	2 - 3 fl oz per acre
Soils with a CEC greater than 20:	3 - 4 fl oz per acre

The above recommendations are a general guideline for irrigation applications.

Please contact an Urth Agriculture specialist for assistance in determining the most effective treatment for your specific crops at 1-888-Y-ORGANIC.
