PRO ENZYME™

SOM PROTOCOL - PART 6
PRO GROW SYSTEM™

PRO ENZYME™ is an essential component of the SOM PROTOCOL within our PRO GROW SYSTEM™ - designed to build healthy soil & produce greater yields. PRO ENZYME™ enables better drainage of excess water OR water-retention in droughts. PRO ENZYME™ is formulated to help achieve less run-off and to inhibit root rot by maintaining water within the soil where it matters most. Enzymes release plant available nutrients and activate natural plant hormones to reduce stress. PRO ENZYME™ also helps to remediate soil, reduce compaction, and compost solids & liquid material.

May be applied through drip, flood, sprinkler or other irrigation systems. Do NOT apply undiluted.
Shake well before use.

IRRIGATION APPLICATIONS

Add 6 fl oz to enough water to irrigate 1 acre.

STORAGE: Store out of direct sunlight in a cool place above 40° F. DO NOT FREEZE.

CAUTION: PRO ENZYME™ is not intended for human consumption. Keep out of reach of children. In case of contact with eyes or skin, flush with water for up to 15 minutes.

NOTE: Information regarding the contents and levels of metals is available at <http://www.aapfc.org/metals.html>
